Professional Summary

AI Engineer and Full Stack Software Developer with hands-on experience in developing scalable AI-powered web applications, automation systems, REST APIs, and real-time communication platforms. Skilled in Python, FastAPI, Next.js, React, Node.js, Machine Learning, LLM integrations, Docker, and cloud-based development workflows. Experienced in building intelligent automation pipelines, chatbot systems, voice AI platforms, deep learning models, and Android applications. Strong understanding of software engineering principles, Agile methodologies, backend architecture, API integration, database management, and AI-driven product development.

Experience

Software Engineer

BitPix Soft

Jul 2025 – Present

Lahore, Pakistan

- Developed **Talkbase**, an AI-powered voice calling platform using Next.js, FastAPI, Twilio, and LiveKit for low-latency local and international AI communication.
- Designed, developed, and integrated scalable RESTful APIs while following Agile software development methodologies and collaborative engineering workflows.
- Worked on backend architecture, real-time communication systems, API optimization, and AI workflow integration.

AI & Automation Expert

Robx.AI

May 2025 – Aug 2025

Remote

- Built an AI-powered customer support chatbot using OpenAI APIs, n8n, Docker, SMTP automation, and workflow orchestration tools.
- Implemented Facebook Marketplace automation pipelines and intelligent process automation workflows for business operations.
- Optimized automation processes and integrated AI-based conversational systems for customer engagement.

Education

National University of Computer and Emerging Sciences (FAST-NUCES)

Bachelor of Science in Computer Science — CGPA: 3.16

Aug 2022 – Jun 2026

Lahore, Pakistan

Technical Skills

Programming Languages: Python, C, C++, C#, JavaScript, Kotlin, PHP, x8086 Assembly

Frontend Development: HTML5, CSS3, React.js, Next.js, Tailwind CSS, Responsive UI Development

Backend Development: FastAPI, Flask, Express.js, Node.js, REST API Development, API Integration

Artificial Intelligence & Machine Learning: TensorFlow, Keras, LSTM RNN, OpenAI APIs, LLM Integration, Deep Learning, AI Automation, NLP

Databases: MongoDB, MySQL, PostgreSQL, SQL Server, Firebase Realtime Database

DevOps & Tools: Git, Docker, Selenium, Jira, Figma, Twilio, LiveKit, n8n, Agile Development

Mobile & Game Development: Android Studio, React Native, Unity, Photon Pun2

Projects

Talkbase

Next.js, Tailwind CSS, FastAPI, Twilio, LiveKit

Developed an AI-powered voice communication platform for creating intelligent AI callers capable of handling local and international calls with minimal latency using Large Language Models (LLMs).

MobiCrash

Python, Next.js, FastAPI, Twilio

Built an AI-based traffic monitoring and surveillance system utilizing Safe City camera feeds to detect mobile phone usage while driving and automatically generate challans and authority alerts.

StayVerse

React.js, Node.js, Express.js, MongoDB

Developed an Airbnb-style hotel booking and management platform featuring AI-based recommendation systems, analytics dashboards, authentication, and dynamic booking workflows.

Transcribe

React.js, Rust, Python

Created an AI-powered desktop application for meeting transcription, minutes generation, speech processing, and workflow automation.

CuraSense

Python, Gradio, Grok API

Built an AI healthcare assistant supporting image and voice-based disease prediction with precaution recommendations and text/audio responses.

ChatBot Generator

Python, React.js, Tailwind CSS

Developed a customizable AI chatbot generation system capable of building domain-specific conversational assistants from user-provided data.

Next Word Prediction*Python, LSTM RNN*

Implemented a deep learning-based next-word prediction model using LSTM neural networks for sequence generation and NLP tasks.

CasaConnect*Kotlin, Firebase*

Developed a real estate Android application with property listings, booking systems, authentication, search functionality, and Firebase realtime database integration.

Professional Resume Website*React.js, Tailwind CSS*

Designed and deployed a responsive portfolio and resume website with modern UI/UX principles and optimized frontend performance.

Additional Projects: Social Media Platform (C++ OOP), E-commerce Application (Kotlin), Leave Management System (C++), Sudoku Solver using Backtracking (C++), Ticketing System (Python OOP/DSA), Flappy Bird Clone (x8086 Assembly), Josephus Problem Visualizer (C++ with SFML Graphics).
